A systematic energizing and balancing of your chakra system takes place. when the disks are placed on your chakras while listening to relaxing music.

The disks re-energize the blocked chakras and harmonize the balance of the being (Yin and Yang) The Quantum Balancing treatment is often conducted by a trained spa therapist, but can also be done at home

The set consists of 7 precisely colored and technically engineered glass disks, one for each of the 7 main chakras. These disks have been produced in Germany using precise color matching resonance and heat fusion technology, the energy of the disks remain permanent and can not be changed. The disks are stored in a bio resonance engineered pewter storage box. The box is not only for convenient storage, but it also removes any unwanted energetic residue from used discs and resets them to the optimum frequencies. For that purpose allow minimum 10 minutes to discharge and recharge them.

## MORE ABOUT CHAKRAS

Modern science tells us that the human organism is not just a physical structure but is composed of energy fields. They are constantly changing, ebbing and flowing like the sea. Scientists are now able to measure these subtle energies and are developing new and better methods for diagnostics and treatments.

Traditional Chinese Medicine calls these subtle energies in the body for CHI or Life force energy.

This life force energy interfaces with our organs and bodily systems at seven major points.

These points resemble spinning vortexes, and each of them resonates with the others to enable you to maintain optimum wellbeing. They are called chakras.

Most people do not see chakras spinning but they feel the effects.

There are several variations of the number and appearances of the chakras, However, the most well-known refers to seven major chakras located in a line running from just above the crown of your head to the base of your spine.

The state of each chakra reflects the wellbeing of this particular area of the body. It also reflects the psychological, the emotional and spiritual well-being.

Each chakra is associated with particular colors, sounds, organs, emotions and mental attitudes.

Chakras are energy centers. They function like receivers and transformers of the various forms of CHI. The chakras take in the vital energy and convert it into the frequencies needed by the various areas of the physical body for sustenance and development of physical, emotional and mental bodies.

The seven primary chakras are located along a central vertical axis of our spine and open toward the front of the body like a flower. These circular energy centers are in constant motion, rotating - receiving or radiating energy. At the center of each chakra, is a stem-like channel that extends to the spine where it merges with it, thus connecting the individual chakras with a central energy channel which ascends within the spine to the top of the head.

Every thought and experience you've ever had in your life gets filtered through these chakra databases. Each event is recorded into your cells. In other words, "your biography becomes your biology." When chakra energy is blocked or misdirected, emotional and physical illness can arise.

If a chakra is closed, partly blocked or out of balance, chi energy cannot flow through the chakra system. Consequently problems may develop on the physical, emotional and mental levels. The blockages and negative energies can be removed by placing the Chakra Disks on each chakra as directed.
